ACRYFIN® Acrylic Polymer Coatings
Revives Decks, Docks & Porches

ADCO*innovations* inc.

Specialty Coatings

WHY ACRYFIN®?

Simply put, ACRYFIN® is the best product available when it comes to **deck coatings, dock coatings, and concrete coatings!** This proven, superior acrylic polymer coating is used to restore, renew, and revitalize your deck paint, concrete stain, wood coating, exterior paint, and more.

The do-it-yourself products sold in big box stores do not hold up over time. Alternatively, ACRYFIN® is designed to preserve and protect surfaces for many years — not just one — as well as handle moisture and wear and tear flawlessly.

ACRYFIN® provides the perfect long-lasting solution for marinas and docks to residential decks and porches to restore and repair rather than replace!

OUR PROCESS

Clean

First, we pressure wash and completely deep clean the entire surface of your dock or deck.

Prime

Then, we prime your dock or deck with ACRYFIN® Primer to make sure the coating stays in place.

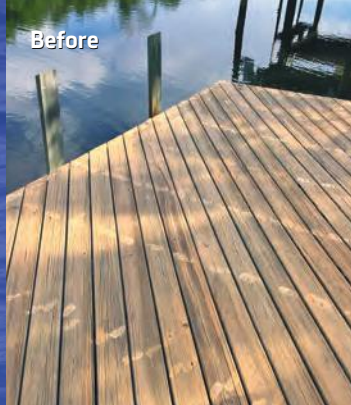

Coat

Next, we apply stain, combined with our ACRYFIN® Coating, to fill cracks and create a non-slip surface.

Seal

Lastly, we finish the surface with ACRYFIN® UV Sealer to ensure the coating will last for a minimum of 10 years!
